2] Which of the below is/are a valid CSS classes provided by an angular that reflects validity of form controls?

Ans: A. ng-valid

3] Which is the correct way to define routerlink having static value of "users"?

Ans: b)

4] True or false: When two components communicate with each other via a common service, both components need to have same instance of the service?

Ans: True.

5] Which directive/tag is required to load a routed component?

Ans: B) <router-outlet>

7] Which of the below is/are a form validation(s) property in angular ?

Ans: d) All of the above.

.dirty, .valid, .touched

10]Which of the below is a valid property of the annotations @component?

Ans: a) StyleUrls

12] Correct line of code to import 'Subject' while working with Observables?

Ans: c) import {Subject} from 'rxjs/Subject'

13](14) Which of the below is true about RxJS?

Ans: B,C

14] Which service enables to change the route of an application Programmatically (without user performing action)?

Ans:

15] Which of the below are features of routing?

Ans: d) All of the above

      Enables to make the application Single Page

      Page does not get re-loaded for every URL request

      Loads Components based on the URL

20] Which of the below is a valid Angular Directive?

Ans: AngularJS directives are extended HTML attributes with the prefix ng-

22] Which module has to be added to the 'imports' array of the AppModule to make Http requests in angular?

Ans: a) HttpClientModule

27] When we call the readyState "2"(i.e. xhr.readyState = 2)?

Ans: C. After you have called send()

28] Suppose we have a method getUsers() which makes an http request to fetch a list of users as Observables. Which of the following is the correct way to subscribe to get users()?

Ans: b) this.userservice.getUserList().subscribe(data=>{ this.userList = data})

31] which of the below directive can be used for conditionally displaying an element?

Ans: c) *ngIf

32] Which of the below annotations can be applied to class variables?

Ans: A) @output nss. All of the above.

33] Which of the below is valid angular package?

Ans: D

35] Which of the below is valid form control directive that provides validity properties for an input box?

Ans: c) ngModel Not so sure.

36] Which of the below is/are Angular's Features?

Ans: All of the above.

37] All methods of the HttpClient Service return Observation by default true or false?

Ans: True

39] Which event helps a form to be submitted but at the same time doesn't cause the form to be posted to any serverside URL?

Ans: C. submit /// ng submit

40] settings.xml is used to configure

41] What is the significance of the property "imports" for annotations @NgModule?

Ans: b) It contains list of other modules required by a module.

44] True or false? When a service is provided in a module, all its components get a singleton instance of that service.

Ans: True nss

43] True or false? Services cannot be injected in another service.

Ans: False

46] Which of the below annotations enables a child components to get data from parent component?

Ans: @input

49] True or false? Every angular application has atleast one root module named as AppModule by default.

Ans: True.

50] Let say a custom component is created with name "Products"……..

Ans: A) declarations:[Products]

51] What is the return type of a get() call made using the httpClient Service for an Http GET request?(35)

Ans: A. Observable

52] Correct syntax to define an Angular module

Ans: Declarations, imports, providers, bootstrap

53] Suppose we have the below code………loginComponent(login)………How will 'name' property defined in the login component class?

Ans: B. @Input() name:string

54] Which module needs to be imported to work with ngModule?

Ans: Forms Module.

1] Which of the below is the right way to define a template reference variable named "testval" for an input box?

Ans: A. <input type = "text" #testval (keyup)="0"/>

3] What is the significance of the property "imports' for the annotations @NgModule?

Ans: B. list of other modules req. by a module

8] Which of the below statement is ture in angular Routing application?

Ans: A. Wildcard.

12] Which of the below is/are valid property binding examples ?

Ans: B. assume path…

13] Which file in an angular application (generated using angular cli) lits all package dependences?

Ans: c. package.json

14] Which of the below is a valid property of the @component()?

Ans: c. selector

16] The _____ property is used to define child routes for a given route mapping

Ans: B. children

41] property binding is an example of two way data binding

Ans: False

19] Which of the below is a valid Angular Directive?

Ans: D. all of the above (ng for, keyup, ngModel)

20] _____ is a command line tool to convert Typescript code to javscript equations.

Ans:

21] If we want to share same state of a service only between a parent and its child component then the service has to be injected in…………..

Ans: A. Parent component.

22] The annotation @NgModule is part of _____ Package

Ans: B. @angular/core

23] True or false . When components communicate with each other….

Ans: True

24] Which of the below life cycle hooksis/are called after every change to input properties before updating the view?

Ans: C. ngOnChange

25] Two components can share data via a common ----------

Ans:B. service

26] What is the use of declarations array in @NgModule() ?

Ans: B. to declare components, custom directives and pipes part of the module.

28] Which of the below is/are valid features of observables?

Ans: A, B,

35] Which of the below feature(s) is/are true about Root module concept?

Ans: D. all of the above

37] Which of the below is the correct way to define two way data binding for a variable phone?

Ans: A. <input type = "text" [(ngModel)]="phone">

38] The bootstrap property of @NgModule() accepts _____

Ans: B. A single component name.

39] Services need to be marked with the_____ annotations inorder to be injectable.

Ans: B. injectable.
